

Blue Cross Blue Shield of Arizona and the Mayo Clinic

An important factor for employers when selecting a health plan is the strength of the provider network. Blue Cross Blue Shield of Arizona (BCBSAZ) is happy to announce that, as of May 1, 2017, the prestigious Mayo Clinic has been added to our CHS network.

About Mayo Clinic

Mayo Clinic has decades of experience treating various rare conditions. Doctors at Mayo Clinic cover virtually every specialty and subspecialty, and have extensive experience with a vast number of medical needs including rare conditions treated in few other places. Their teams of experts work together to provide thorough evaluations, accurate diagnoses, and individualized treatment plans.

Essentially all medical services you may need – doctor visits, tests, surgery, hospital care – are available “under one roof” at Mayo Clinic. Scheduling of these services is coordinated and efficient, and includes a detailed itinerary to help you plan your visit.

Part of Mayo Clinic’s mission is to keep looking for new and better ways to manage disease states and patient care. Because their doctors across all specialties are engaged in research, their patients are frequently among the first to benefit from innovative ideas. As a result, Mayo Clinic is regularly rated near or at the top in hospital quality measures.

Network access available to BCBSAZ clients within Arizona.
